

Capability statement

Supply / Logistics / Field Services

CONUS + OCONUS

MATERIALS / COORDINATION / EXECUTION

Giving Tree is a federal prime contractor supporting construction supply, logistics and field services across CONUS and OCONUS. We coordinate material sources, transportation, equipment and on-site support, including remote, island and international requirements.

CORE CAPABILITIES

Supply

Aggregates and bulk materials, geotextiles, drainage products and other construction supplies.

Logistics

Supplier coordination, transportation, marine movements, delivery sequencing and difficult-access requirements.

Field services

Project management, subcontractor and equipment coordination, quality control and delivery documentation.

SELECTED EXPERIENCE

U.S. ARMY / PANAMA

Material supply and OCONUS logistics

Supplied a multi-material earthwork package with aggregate, geotextiles, silt fencing and drainage materials. Deployed personnel in-country, established local supply and coordinated deliveries within a short mobilization window.

U.S. FISH & WILDLIFE SERVICE / VIEQUES, PR

Remote island material supply

Coordinated roadway-material supply through mainland trucking, marine transport, port coordination, island hauling and stockpile delivery. The project scope requires planning around transportation constraints and access windows.

NATIONAL PARK SERVICE / GREAT SMOKY MOUNTAINS

Aggregate supply and remote access

Awarded an aggregate program across base and option locations in Tennessee and North Carolina. The scope includes quarry supply, trucking, delivery sequencing, spreading and stockpiling while accommodating public access.
